

Fill in medical questionnaire anytime, and see your results anywhere from smartphones, tablets, and PCs.

## New Services

### 【 Fill in medical questionnaires on the web 】

You can fill in a little at a time when you have time, or on the morning of the day if you need a last minute answer.

There is a check function for content you filled in, so there are no omissions.

From April 2022, save your previous answer. Just fill in the parts you have changed.

### 【 Seeing your results on the web 】

You can see your results of some blood tests ahead of time, 1 to 3 days after medical checkup. (The number of days until the data is reflected varies depending on the course.)

You can also see your past results and compare it with the previous results to understand changes in your health status. The results of the medical checkup can be used in outpatient consultations with doctors.

Clinic	Tokyo Midtown Clinic	Tokyo Midtown Clinic
Course	内科総合診療科	内科総合診療科
Date of Screening	2022/07/06	2022/07/09
